Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to engine based vehicle with an air motor, classified in class 180, subclass 165.
 - II. Claims 9-12, drawn to a fuel-cell based vehicle, classified in class 180, subclass 65.1 or class 429, subclass 12+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are based on vehicles having distinct and separate fueling and power supply arrangements-- invention I being based on an engine fuelling arrangement, invention II based on a fuel cell powering arrangement.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
